EXPERIENCE

- **Blinkit** Apr. 2026 - Present
Software Development Engineer - I
Gurugram, India
 - Developing the **Backend-for-Frontend (BFF)** orchestration layer in **Golang** for Blinkit's homepage, aggregating upstream services into per-client widgets for **20M+** DAU, with timeouts and fallbacks for resilience to upstream failures.
 - Designed a reusable workflow, aggregation layer, and component to surface saved addresses on the non-serviceable screen, with dynamic sorting and display limits, reducing the ordering flow to a **single click**.
 - Built a custom **Claude agent skill** that generates the logic for reusable workflows, cutting the effort to write a new workflow by **76%**; **adopted team-wide within a week** after code reviews.
 - Integrated real-time chilled-inventory state into product cards, conditionally displaying the "Chilled" tag based on availability data and reducing related customer complaints by **36%** in **one week**.
- **Deutsche India Pvt. Ltd. (Deutsche Bank)** Jul. 2025 - Apr. 2026
Graduate Analyst
Bengaluru, India
 - Designed an **AI-powered system** to automate **trade document workflows**, resulting in a **66% reduction** in manual effort.
 - Benchmarked agentic AI patterns like **ReAct** and **Self-Correction** to optimize **accuracy, latency** and **cost**.
 - Implemented AI agents with **Google's ADK** using **Gemini 2.5** models and integrated them into **Quarkus** microservices.
 - Delivered a detailed **proof of concept** demonstrating up to **50% faster** and more reliable **trade settlements**.
- **Perpetuum Innovations Pvt. Ltd.** May 2024 - Jul. 2024
Software Engineering Intern
Gurugram, India
 - Developed an **Admin Tool** for the **Spill app**, empowering the team to manage and oversee operations for **1000+** users.
 - Built with **React.js**, **Node.js**, and **GraphQL**, optimizing data retrieval and handling across **10+** tables.
 - Implemented features to **blacklist/whitelist users**, manage invitations, **send notifications**, and handle content storage.
 - Integrated a **caching mechanism** using **Cloudinary**, reducing the application's average response time from **1s** to **153ms**.

EDUCATION

Indian Institute of Technology Guwahati Nov. 2021 - Jul. 2025
Bachelor of Technology in Electronics and Communication Engineering

PROJECTS

- **Techniche Website** Nov. 2023 - Aug. 2024
Techniche - The Annual Techno-Management Fest of IIT Guwahati
Website
 - Developed a robust and responsive website using **React.js** and **Node.js** to establish Techniche's online footprint.
 - Designed and configured an optimized **MySQL** data storage solution for handling event registrations from **300+** cities.
 - Deployed the website on an **AWS EC2 instance** with ongoing vulnerability checks and cyberattack monitoring.
 - Attracted **10k+** unique visitors and **800k+** views on the website **monthly** before the event with **zero downtime**.
- **Jotion - Cloud-Based Document Management** Dec. 2023
Personal Project
Website | GitHub
 - Built a rich content editor using **Next.js**, supporting dynamic **text and image content** for complex document creation.
 - Integrated Clerk for secure authentication with **Google** and **GitHub**, utilizing Convex for real-time database operations.
 - Engineered **nested notes** in a **tree-like structure**, **dynamic headings**, and options to **move to trash** or **delete permanently**.
 - Enabled **one-click web publishing** of notes, allowing users to effortlessly share their work online.
- **Low Latency Facial Recognition** Jan. 2024 - Apr. 2024
Prof. Gaurav Trivedi, Department of EEE, IIT Guwahati
Report | GitHub
 - Implemented a facial recognition system with **ResNet-18** on a **Nexys A7-100T** FPGA, improving real-time performance.
 - Accelerated the **CNN computations** with FPGA-based **parallel processing**, ensuring latency as low as **79ms**.
 - Integrated **UART** for data transfer between FPGA and external devices, and achieved **96% accuracy** on the test set.

TECHNICAL SKILLS

Programming Languages: Golang, Java, C/C++, Python	Databases & Caching: MySQL, MongoDB, ArangoDB, Redis
Backend Development: REST, gRPC, Spring Boot, Node.js	Observability & Monitoring: Grafana, Datadog
Infrastructure: Kubernetes, Docker, AWS, Linux, Bash	Developer Tools: Git, GitHub, Kafka*
AI Tools: Claude Code, GitHub Copilot, Cursor	Methodologies: Agile, Behaviour Driven Development (BDD)
	*Elementary Proficiency

RELEVANT COURSEWORK

Computer Science: Data Structures and Algorithms, Computer Networks, Operating Systems, Database Management
Machine Learning: Pattern Recognition and Machine Learning, Recommendation System Design Using Deep Learning
Mathematics: Linear Algebra, Probability and Random Processes, Computer aided applied optimization

EXTRA CURRICULARS

- **WebOps Head**, Techniche IIT Guwahati Nov. 2023 - Sept. 2024
 - Led a **three-tier** team of over **20** developers in ideating, implementing and managing web portals for **Techniche**.
 - Led a team of **400+** volunteers to provide logistics and infra support for **50k+** **visitors** across **40+** events on campus.
